Professional Summary

Motivated and self-confident individual with professional experience in IT, SEO, and data analytics. Completed a six-month internship at DAITONN, contributing to web and mobile application development using React, C++, .NET, and SQL. Gained experience in SEO optimization and AI-focused tasks at FMBS Company. Skilled in Python (pandas, NumPy, matplotlib), SQL, and data analysis, with experience in model building (classification, regression) and anomaly detection. Passionate about AI/ML systems, data-driven decision-making, and full-stack development, eager to apply knowledge in real-world projects and innovative solutions.

Education

London Metropolitan University, BEng (Hons) in Software Engineering Sep 2024 – Sep 2025

- **Final Project:** IoT-Based Multifunctional Smart Pot for Plant Caring

BCAS, BTEC Level 5 HND in Computing Jan 2021 – Aug 2024

Experience

Software Engineer Intern, DAITONN – Colombo Jan 2024 – Jul 2024

- Developed and maintained full-stack features for a SaaS-based e-commerce platform using React and .NET technologies.
- Implemented secure user authentication, role-based access control, and session management.
- Designed and integrated RESTful APIs for product management, orders, and subscription services.
- Worked with SQL Server to design database schemas, write optimized queries, and manage data integrity.
- Enhanced application performance and responsiveness through UI optimization and code refactoring.
- Collaborated in an Agile/Scrum environment, participating in sprint planning, code reviews, and daily stand-ups.
- Performed debugging, unit testing, and API testing using Postman to ensure software reliability.
- **Tools & Technologies:** React, HTML, CSS, JavaScript, Bootstrap, .NET Framework (C#), REST APIs, SQL Server, Git, GitHub, VS Code, Visual Studio, Postman, Agile/Scrum

SEO & Data Analyst / AI Enthusiast, FMBS – UK-based Company May 2025 – Oct 2025

- Applied technical SEO strategies including site audits, structured data validation, and performance optimization.
- Automated SEO data analysis workflows using Python and Excel for reporting and insights.
- Analyzed large datasets from Google Analytics and Search Console to identify trends and optimization opportunities.
- Prepared clean and structured datasets for AI models, data analysis, and automation experiments.
- Worked closely with developers to implement SEO-friendly code and improve website performance.
- **Tools & Technologies:** Google Analytics, Google Search Console, Excel, Python, SEO tools

React Developer, AEIOUVA Company Nov 2025 – Apr 2026

- Developed and maintained dynamic frontend components using React .
- Built and integrated backend features using PHP to support full-stack application functionality.
- Collaborated with cross-functional teams to design and deliver scalable web solutions.
- Optimized application performance through efficient state management and component reusability.
- Participated in code reviews, debugging, and testing to maintain high code quality.
- **Tools & Technologies:** React, JavaScript, PHP, HTML, CSS, Git, VS Code

Projects

Gas Distribution System — Web & Mobile Application

github.com/Saji59/GasByGas

- Built a mobile app using React Native for home gas delivery.
- Implemented real-time delivery location tracking.
- Integrated mobile and web platforms for seamless order management.
- **Tools:** React Native, JavaScript, REST API, Firebase

Chat Assistance — AI-Powered Support Tool

github.com/Saji59/Chat

- Developed an automated query-handling system using Python.
- Applied NLP techniques to understand user input.
- Designed lightweight modules for fast, efficient responses.
- **Tools:** Python, NLP, APIs

Nike MERN App — Full-Stack Web & Mobile Application

github.com/Saji59/Nike

- Created an e-commerce platform using MERN stack.
- Implemented authentication, catalog, and cart systems.
- Developed responsive UI for mobile with React Native.
- **Tools:** MongoDB, Express.js, React, Node.js

Java Projects Collection

github.com/Saji59/java

- Developed Java-based applications focusing on backend concepts.
- Practiced OOP, data structures, and file handling.
- **Tools:** Java, OOP Concepts

Skills

Programming & Data: Python, SQL, Java, C++, JavaScript

Web & Mobile: React, React Native, Node.js, Express.js, HTML, CSS, Bootstrap

Data Science & ML: Data analysis, analytics, ML models (classification, regression), anomaly detection

SEO & Analytics: Keyword research, on-page SEO, traffic analysis, user behavior tracking, Google Analytics, Google Search Console

Tools & Platforms: Jupyter Notebook, Git/GitHub, Postman, Visual Studio, VS Code, Agile/Scrum

Expertise: Full-Stack Development, Mobile Apps, IoT Systems, UI/UX, Real-Time Data Integration, SEO Optimization

Professional Skills

- Strong problem-solving and debugging ability.
- Teamwork & collaboration in agile environments.
- Fast learner with adaptability to new technologies.
- Effective communication for technical discussions.
- Analytical thinking with experience in SEO insights, data interpretation, and decision-making.

Achievements

- Developed multiple full-stack and mobile applications (IoT Smart Pot, Gas Distribution System).
- Completed internship at DAITONN (React, C++, .NET, SQL).
- Led final-year research: IoT Smart Home Security System with AI anomaly detection.
- Published open-source projects: Chat Assistance, Nike MERN App, Java Projects.
- Recognized for strong teamwork, leadership, and problem-solving skills.
