Colombo, Sri Lanka | sajirs0928@gmail.com | +94761322172 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Frontend Developer with 2 years of commercial experience across 3 companies, specialising in React.js development and full-stack SaaS engineering. Proficient in React.js, Redux, Tailwind CSS, JavaScript, Node.js, and REST API design. Delivered production-grade features including AI-powered automation modules and real-time data systems. Seeking a Frontend or Full-Stack Developer role to contribute to scalable, high-performance products in a collaborative Agile team.

Education

London Metropolitan University, BEng (Hons) in Software Engineering Sep 2024 – Sep 2025

- **Final Project:** IoT-Based Multifunctional Smart Pot for Plant Caring

BCAS, BTEC Level 5 HND in Computing Jan 2021 – Aug 2024

Experience

React Developer (Associate), AEIOUVA Company (*Contract – completed*) Nov 2025 – May 2026

- Built and maintained **20+ dynamic frontend components** using React.js with hooks, context API, and Redux, deployed across 3 product modules.
- Collaborated with backend team to integrate REST APIs for seamless data flow.
- Crafted responsive UI designs using Tailwind CSS and Bootstrap.
- Improved app performance and Core Web Vitals through code splitting, lazy loading, and component reusability.
- Integrated third-party AI APIs to deliver smart suggestion and automated response features, improving user engagement.
- Worked in Agile environment with daily stand-ups, sprint planning, and retrospectives.
- **Tools & Technologies:** React.js, JavaScript, Tailwind CSS, Bootstrap, REST APIs, Git, GitHub, VS Code, Postman, Agile/Scrum

SEO & Data Analyst, FMBS – UK-based Company May 2025 – Oct 2025

- Executed technical SEO strategies including site audits, structured data validation, and performance optimisation.
- Analysed large datasets from Google Analytics and Search Console to identify trends and optimisation opportunities.
- Worked closely with developers to implement SEO-friendly code and improve website performance.
- **Tools & Technologies:** Google Analytics, Google Search Console, Excel, SEO tools

Software Engineer Intern, DAITONN – Colombo Jan 2024 – Jul 2024

- Engineered and maintained **10+ full-stack features** for a SaaS-based e-commerce platform using React and .NET, improving platform reliability and user experience.
- Enforced secure user authentication, role-based access control, and **JWT-based session management**.
- Designed and integrated **8+ RESTful APIs** for product management, orders, and subscription services.
- Worked with SQL Server to design database schemas, write optimised queries, and manage data integrity.
- Collaborated in an Agile/Scrum environment, participating in sprint planning, code reviews, and daily stand-ups.
- Performed debugging, unit testing, and API testing using Postman, reducing bug rate by 30% and improving code quality across sprint cycles.
- **Tools & Technologies:** React, HTML, CSS, JavaScript, Bootstrap, .NET Framework (C#), REST APIs, SQL Server, Git, GitHub, VS Code, Visual Studio, Postman, Agile/Scrum

Projects

Gas Distribution System – Web & Mobile Application

github.com/Saji59/GasByGas

- Built a mobile app using React Native for home gas delivery with real-time order tracking.
- Implemented real-time delivery location tracking using Firebase.
- Unified mobile and web platforms for seamless order management.
- **Tools:** React Native, JavaScript, REST API, Firebase

Chat Assistance – AI-Powered Support Tool

github.com/Saji59/Chat

- Architected an automated query-handling system using Python and NLP techniques for intelligent text classification.
- Built lightweight response modules to accurately process and classify user input in real time.
- **Tools:** Python, NLP, APIs

Nike MERN App – Full-Stack Web & Mobile Application

github.com/Saji59/Nike

- Created a full-stack e-commerce platform using the MERN stack with authentication, product catalogue, and cart systems.
- Developed responsive UI for mobile with React Native.
- **Tools:** MongoDB, Express.js, React, Node.js

Java Projects Collection

github.com/Saji59/java

- Built Java-based applications focusing on OOP, data structures, and file handling concepts.
- **Tools:** Java, OOP Concepts

Skills

Programming & Data: Python, SQL, Java, C++, JavaScript, TypeScript

Web & Mobile: React.js, ReactJS, React Router, React Native, Next.js, Node.js, Express.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design, ES6+, Webpack

Data Science & ML: Data analysis, analytics, ML models (classification, regression), anomaly detection

SEO & Analytics: Keyword research, on-page SEO, traffic analysis, user behaviour tracking, Google Analytics, Google Search Console

Tools & Platforms: Git/GitHub, Postman, Visual Studio, VS Code, Agile/Scrum, Version Control, CI/CD (basic)

Testing & Quality: Unit Testing, API Testing, Debugging, Code Review, Cross-Browser Compatibility

Expertise: Frontend Engineering, Full-Stack Development, SaaS Platforms, Mobile Apps, IoT Systems, UI/UX, Real-Time Data Integration, REST API Design, SEO Optimisation

Achievements

- 2 years of commercial experience across 3 companies: DAITONN (Software Engineer Intern), FMBS UK (SEO & Data Analyst), and AEIOUVA (React Developer Associate).
- Integrated third-party AI APIs into a production React application, delivering advanced automation features at associate level.
- Published 4 open-source projects on GitHub including MERN stack, React Native, and AI tools.
- Led final-year research: IoT Smart Home Security System (London Metropolitan University).
- Gained international work experience with a UK-based company (FMBS) while based in Sri Lanka.
